

The EIL Output Library

Translating Research for Public Audiences

Winn Philpott

Environmental Inequality Lab

Summer 2026

UVA and Batten's research rarely reaches audiences beyond academia.

Goal: centralized, replicable, shareable

Learning by doing.

Paper → Write → Iterate w/ Pls → Outputs

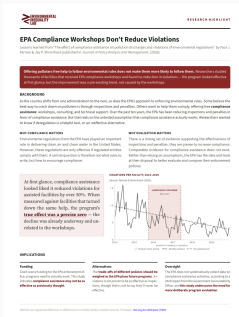

Different goals → different formats

```
papers/  
2026-epa-compliance-workshops/  
data-viz/  research-highlight/  press-release/  blog/  social/  
2025-early-life-pollution/  WP-coal-worker-transitions/  (+3 more)  
  
formats/  
research-highlight/  press-release/  social/  data-viz/  blog/  logos/  
  
style-guides/  
research-highlight/  press-release/  social/  data-viz/  blog/
```

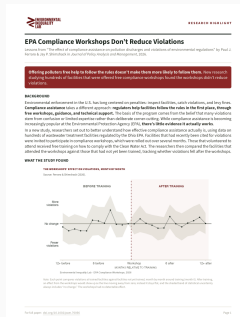

Standardized — style, colors, fonts, structure
Research highlight → foundation for everything else

Case Study: EPA Compliance Workshops — The Iteration

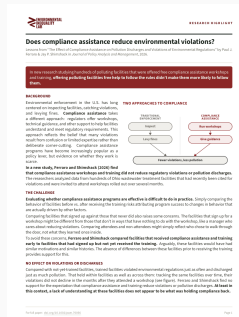

10 versions — same paper, evolving design & content

v1

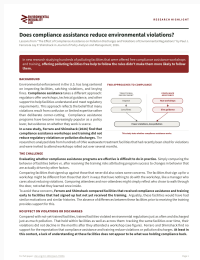

v4

v10

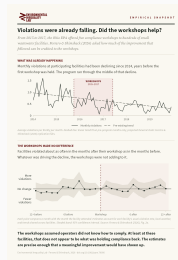

Case Study: EPA Compliance Workshops — The Output

Research highlight

Press release

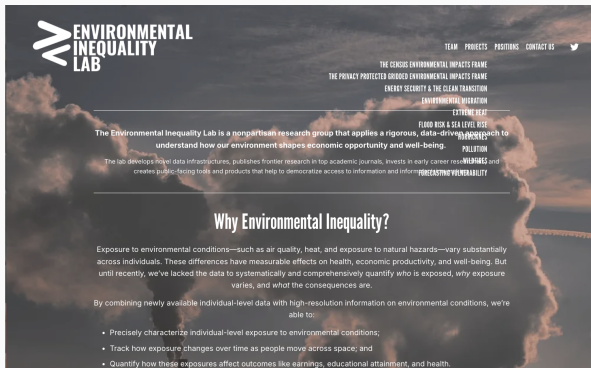

Empirical snapshot

Three social cards

Handoff Idea: Rethinking the Website

Project pages don't link to any highlight, press release, or social post.

Proposal: add them to each project page, plus a site-wide index.

Could apply the same idea to social media.

Missing: account access + a clear mandate

Open question: what's social media actually for?

R & T_EX (figures, graphics, PDFs)

Replicability & version control

PI interviews → framing (& press release)

Directing AI tools — prompting, verifying, iterating

Accessible language for research & findings

Engaging writing vs. honest caveats

“What’s the point of this?”

Personal Takeaways

The work was especially fulfilling surrounded by smart, hard-working, supportive colleagues.
